Product Description

Describe:

Shape and Size:

Dishwasher detergent tablets are typically shaped in a triangular or rectangular block, designed for easy placement into the dishwasher.

They come in various sizes, such as 20g, 15g, 10g, 8g, etc., to cater to dishwashers with different capacities and avoid wastage.

Functional Characteristics:

The tablets offer a combination of cleaning, shining, and anti-scale properties to effectively remove stains, grease, and food residues from dishes.

They feature a unique pre-dissolving technology that rapidly releases active enzymes at low temperatures to break down stubborn dirt.

Suitable for energy-efficient and low-temperature dishwashing cycles, they eliminate the need for pre-rinsing, accelerate drying, prevent scale build-up, and protect the filter.

Ease of Use:

The tablets are designed for single-use, eliminating the need for measuring and simplifying the process.

For dishwashers with a detergent dispenser, simply place the tablet into the dispenser. For dishwashers without a dispenser, place the tablet on the bottom filter of the dishwasher.

The tablet packaging is designed to dissolve quickly when in contact with water, eliminating the need to remove the packaging. After use, reseal the packaging to maintain product quality.
