Product Description

Features of using fragrance beads

1. Composition and Function

Fabric softener beads are formulated with essential oil fragrances and nano-sized fragrance microcapsules.

These microcapsules effectively encapsulate the fragrance, releasing it only under high temperatures or friction, ensuring long-lasting scent on clothing.

2. Usage

Fabric softener beads are easily soluble in water and are added during the laundry process.

As the laundry washes, the fragrance oil and microcapsules adhere to the fabric, providing both softness and scent.

3. Long-Lasting Fragrance

Thanks to the microcapsule technology, the fragrance from fabric softener beads can last up to 12 weeks on clothing, far exceeding the duration of traditional perfumes or fragrances.
