

Antibacterial Descaling Washing Machine Drum Cleaning Powder Agent 200g

Our Product Introduction

Basic Information

- Place of Origin: CHINA
- Brand Name: nuomi
- Certification: CE
- Model Number: Washing machine tank cleaning particles
- Minimum Order Quantity: 100box
- Price: Negotiable
- Packaging Details: 0.2kg
- Delivery Time: 7-15days
- Payment Terms: T/T
- Supply Ability: lakh

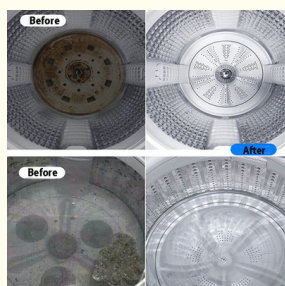

Product Specification

- Product Name: Washing Machine Tank Cleaning Particles
- Specification: 100g*2packs
- Function: Wash The Washing Machine
- Material: OZONE Granules, Baking Soda, Sodium Percarbonate, Multiple Surfactants, Fungicides, Etc
- Package: 100g*2packs
- Weight: 200g
- Suitable: All Washing Machine Models
- Applicable Capacity: One Pack At A Time
- Highlight:
 - descaling washing machine drum cleaning powder
 - antibacterial washing machine drum cleaning powder
 - antibacterial automatic washing machine cleaning powder

Product Description

Drum pulsator washing machine cleaner antibacterial descaling washing machine tank cleaning agent

Describe:

1. Deep penetration, completely disintegrating stains

This washing machine tank cleaner uses advanced penetration technology to penetrate deeply into every corner of the washing machine tank, completely breaking down and removing those hard-to-reach stains, oils and bacteria. Whether it's dirt hidden in the crevices or stubborn stains adhering to the barrel wall, it can remove them one by one, giving your washing machine a new lease of life.

2. Active oxygen technology, sterilization and deodorization in one

Our washing machine tank cleaner uses active oxygen technology, which not only effectively kills bacteria and viruses in the washing machine tank, but also removes odors, creating a healthy and fresh washing environment for you. Active oxygen can quickly react with bacteria and odor molecules to achieve rapid sterilization and deodorization.

3. Environmentally friendly materials, safe and worry-free

Our washing machine tank cleaner is made of environmentally friendly materials, contains no harmful chemical ingredients, and is safe and non-toxic. You can safely use it to clean the washing machine tank without worrying about any impact on the home environment or human health. At the same time, its packaging also uses environmentally friendly materials, which is in line with the concept of green environmental protection.

Tips

When the dirt is severe, please use warm water at 40°C for more effect, and it is recommended to soak for 2-3 hours when using it for the first time

Product name	Washing machine tank cleaning particles
Specification	100g*2packs
Function	Wash the washing machine
Material	OZONE granules, baking soda, sodium percarbonate, multiple surfactants, fungicides, etc
Package	100g*2packs

Really solve the washing machine cleaning problem

Sterilization rate 99.99%
Washing machine sink cleaner

No soaking
Deep cleaning and descaling

- Deep cleansing
- Sterilization and antibacterial
- Descaling and decontamination

抑菌率达99.99%

About Washer Drum Cleaner - A Q&A

Q: What is a washer drum cleaner?

A: A washer drum cleaner is a specialized cleaning product used to clean the interior of a washing machine's drum. It penetrates deep into the drum to remove accumulated dirt, bacteria, and odors, keeping the washing machine clean and hygienic.

Q: Why should I use a washer drum cleaner?

A: Over time, the drum of a washing machine can accumulate dirt, bacteria, and detergent residue. These impurities can not only affect the washing machine's performance but also cause secondary pollution to laundry, potentially affecting the health of family members. Using a washer drum cleaner can thoroughly clean the drum, remove these impurities and bacteria, and ensure the proper functioning and washing effectiveness of the washing machine.

Q: What are the main ingredients of a washer drum cleaner?

A: The main ingredients of a washer drum cleaner typically include acidic compounds (such as acetic acid, citric acid), surfactants, enzymes, peroxycarbonate/peroxyacetic acid, etc. These ingredients can break down dirt, remove odors, sanitize, and protect the cleanliness and hygiene of the washing machine drum.

Q: How do I use a washer drum cleaner?

A: Follow the instructions on the product label when using a washer drum cleaner. Generally, pour the cleaner into the washing machine drum, add water to the appropriate level, and select a suitable washing cycle for cleaning. After cleaning, rinse the drum thoroughly with clean water. Avoid getting the cleaner on your skin or in your eyes. If any discomfort occurs, rinse immediately with water and seek medical attention.
