Product Description

Baby wipes, infants, newborns, hands, mouth, farts, baby, children's wet wipes, large pack, family pack

Feature:

Nature of use:

Adult wipes are mainly divided into daily cleaning wipes and disinfecting wipes. Daily wipes usually contain skin care ingredients, no disinfecting ingredients, and are mainly used to clean surface stains. Disinfectant wipes contain disinfectant ingredients and can be used to clean skin abrasions, scratches, and items that require special disinfection.

Children's wet wipes have higher requirements and are generally divided into hand and mouth wipes and PP wet wipes. Hand and mouth wipes usually have milder and safer ingredients, and some are even non-toxic, so you don't have to worry too much even if they are accidentally bitten by your baby. PP cleaning wipes usually contain skin care ingredients. In addition to cleaning and sterilizing, they can also protect your baby's tender skin and prevent red butt.

Add requirement:

Adult wipes may contain alcohol, fragrance and other ingredients that may irritate some people's skin.

Children's wipes generally do not add these ingredients that are easy to irritate the skin. Instead, they use natural plant extracts to ensure gentle care for your baby's skin every time they are used.

Material:

Adult wet wipes come in two main materials: wet-strength paper and non-woven fabric.

Children's wet wipes mainly use spunlaced non-woven fabric, which is higher quality, softer and more suitable for babies' delicate skin.
