Product Description

Description

Discover the revolutionary laundry booster Beads, a premium laundry innovation designed to elevate your wardrobe with a lasting, enchanting scent. These tiny, yet powerful beads work their magic inside your washing machine, embedding your clothes, linens, and towels with a refreshing aroma that persists for up to 12 weeks – a true testament to their long-lasting freshness.

Using the Aroma Infusion Beads is as easy as shaking a desired amount into the included cap and tossing them into the washer drum before adding your laundry, detergent, and fabric softener. These beads seamlessly integrate with your regular laundry routine, amplifying the effectiveness of your detergent and fabric softener to ensure your laundry smells freshly washed and delightful for weeks on end.

What sets the Aroma Infusion Beads apart is their universal compatibility. Safe for use on all fabrics and colors, and suitable for all types of washing machines, these beads offer unparalleled versatility and convenience. Customize your scent experience by adding as many beads as you desire to each load, creating a personalized aroma that is uniquely yours.

Upgrade your laundry routine with the In-Wash Aroma Infusion Beads – where long-lasting freshness meets elegance and sophistication.

Product Display

Our scent booster beads
based on material is
polyethylene glycol

Urea is used as the
base material of
inferior scented beads

Deep sterilization clean

The removal rate of stubborn stains from
clothing is 99.99%
The raw material is mild and non-irritating
Soft care clothing fabric

No sterilizing wash

Clothing residue stains and bacteria can
easily cause skin allergies. Urea residues
tend to damage clothing fibers as well.
Easy to cause skin inflammation.

30 days lasting fragrance

Fragrant microcapsules are evenly wrapped
in particles, slowly dissolving and releasing
fragrant microcapsules during the washing
process, with better fragrance retention
effect and long-term preservation without
deterioration

It doesn't last long

The pigment of the essence is wrapped in
the surface of urea, urea is easily soluble in
water, and the washing process is too fast to
dissolve, resulting in the perfume being drained
away with water and unable to achieve the
retention effect.

Non-toxic and non-irritating

It is widely used in cosmetics
industry and pharmaceutical industry

Toxic gas

Easy hydrolysis to produce ammonia
and other toxic gases
