Product Description

Deacription

1. High efficiency and concentration, strong cleaning power

Washpods adopts a super concentrated formula, which has stronger cleaning power than traditional detergents and can usually provide more than six times the cleaning effect.

This high efficiency and concentration feature allows you to use only one washpod each time to meet the clothing cleaning needs of an entire washing machine, which is both economical and convenient.

2. Convenient and easy to use, saving time and effort

The design of washpods is very user-friendly. When using, you only need to put a condensed bead into the washing machine, without measuring and pouring, which greatly simplifies the laundry process.

The condensed bead can dissolve quickly in water and can play an excellent cleaning effect regardless of the water temperature, making laundry easier and more convenient.

3. Long-lasting fragrance, sterilization and deodorization

Washpods contain a fragrance amplifier that can lock the fragrance on clothes for a long time, keeping the clothes fresh and pleasant for a long time.

At the same time, washpods also add efficient sterilization ingredients, which can effectively remove bacteria and odors on clothes, making clothes cleaner and healthier.

4. Diverse types to meet various needs

Washpods provides a variety of products, such as All-in-One, 2-in-1, 3-in-1 and 4-in-1, etc., to meet the laundry needs of different consumers.

Each type of washpods has unique functions and characteristics, such as the all-in-one type is suitable for cleaning and care of various clothes, and the 2-in-1 type combines cleaning and softening functions.

5. Safe and environmentally friendly, gentle and does not hurt hands

Washpods uses a mild formula, which is very friendly to clothes and skin, and will not cause irritation or damage to the skin of hands when used.

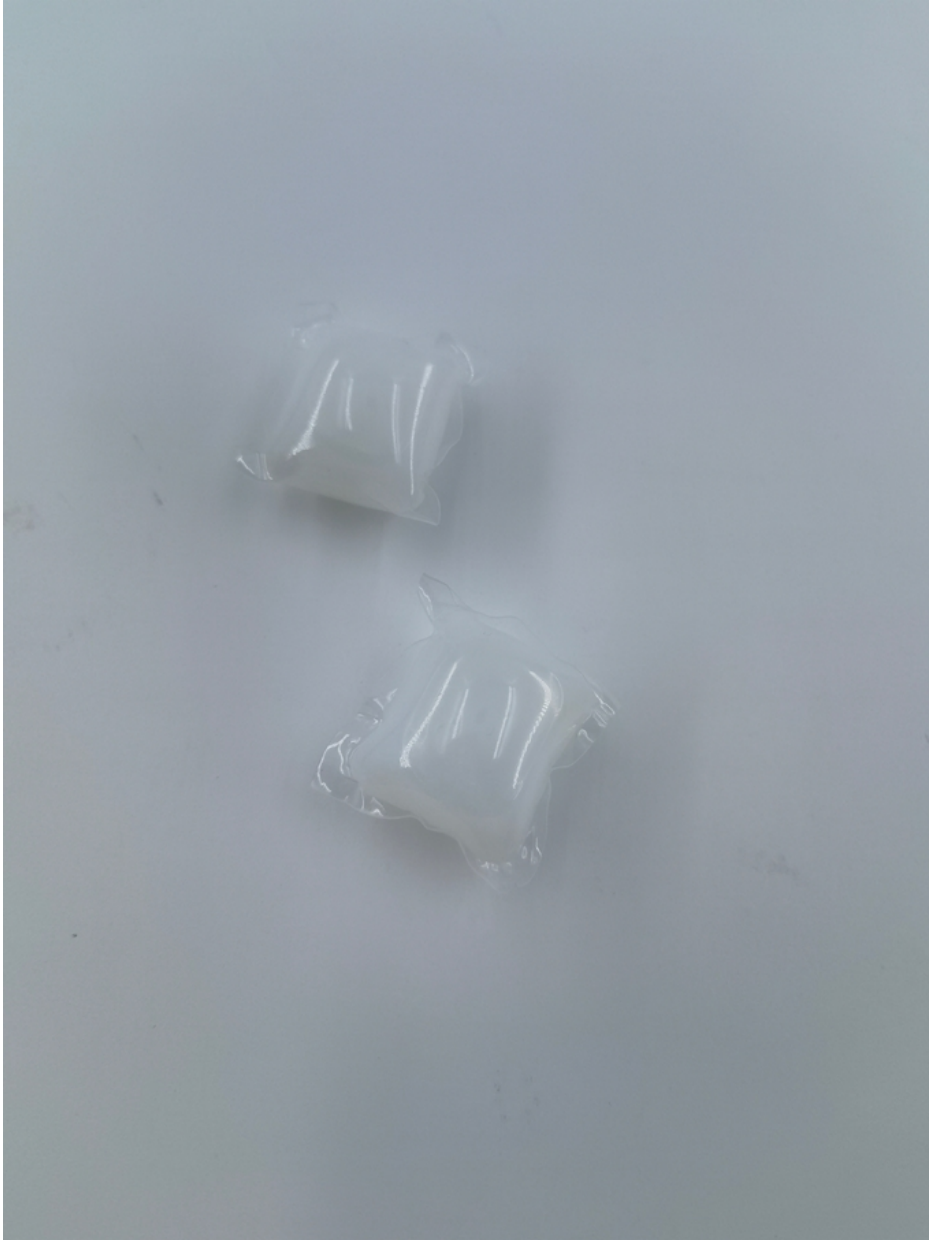

At the same time, washpods also pays attention to the concept of environmental protection, using degradable materials to make packaging and gel beads themselves, reducing pollution to the environment.
