About Washer Drum Cleaner - A Q&A

Q: What is a washer drum cleaner?

A: A washer drum cleaner is a specialized cleaning product used to clean the interior of a washing machine's drum. It penetrates deep into the drum to remove accumulated dirt, bacteria, and odors, keeping the washing machine clean and hygienic.

Q: Why should I use a washer drum cleaner?

A: Over time, the drum of a washing machine can accumulate dirt, bacteria, and detergent residue. These impurities can not only affect the washing machine's performance but also cause secondary pollution to laundry, potentially affecting the health of family members. Using a washer drum cleaner can thoroughly clean the drum, remove these impurities and bacteria, and ensure the proper functioning and washing effectiveness of the washing machine.

Q: What are the main ingredients of a washer drum cleaner?

A: The main ingredients of a washer drum cleaner typically include acidic compounds (such as acetic acid, citric acid), surfactants, enzymes, peroxycarbonate/peroxyacetic acid, etc. These ingredients can break down dirt, remove odors, sanitize, and protect the cleanliness and hygiene of the washing machine drum.

Q: How do I use a washer drum cleaner?

A: Follow the instructions on the product label when using a washer drum cleaner. Generally, pour the cleaner into the washing machine drum, add water to the appropriate level, and select a suitable washing cycle for cleaning. After cleaning, rinse the drum thoroughly with clean water. Avoid getting the cleaner on your skin or in your eyes. If any discomfort occurs, rinse immediately with water and seek medical attention.

Q: Can a washer drum cleaner be used to clean other parts of the washing machine?

A: A washer drum cleaner is primarily designed for cleaning the interior of the washing machine drum. For other parts of the washing machine, such as the exterior casing or control panel, it is recommended to use dedicated cleaners or a soft damp cloth for cleaning. Follow the instructions on the product label and avoid using harsh chemicals or cleaning agents.
